

# Memory Card Forensics for Phone Examiners

## RETRIEVING DELETED DATA FROM MOBILE PHONE MEMORY CARDS

TODAY'S MOBILE PHONES typically contain memory cards with the capacity to store thousands of pictures, hundreds of videos and much more besides. Although phone forensic tools can retrieve "live" data from such cards, they cannot retrieve the deleted data which is often present and could be hugely important to an investigation.

### Course Aims

Memory Card Forensics for Phone Examiners is a 3 day training course designed to teach mobile phone examiners how to retrieve deleted data from memory cards whilst ensuring compliance with the ACPO Principles of Digital Computer Based Evidence. Without proper training and equipment this critical evidence could be overlooked.

### Who should attend?

This course is specifically targeted at phone examiners who have not had prior computer forensics training but do need to examine memory cards. Previous experience in examining mobile phones is not essential but would be beneficial.

### What you will learn

By the end of the course, students will be able to:

- Produce a forensic "image" (exact copy) of the contents of a memory card
- Retrieve deleted data from memory cards found in mobile phones
- Retrieve deleted data from selected Nokia handsets (e.g. N95 8GB)
- Identify situations where further detailed analysis by a computer forensics analyst is required
- Explain and justify their actions in court

### Why Control-F?

Kevin Mansell, managing director of Control-F and designer of this course, worked for three years at the UK police Centre for National High Tech Crime Training at Wyboston. During that time he developed and delivered what became a recognised entry-level training course for police phone examiners.

Since 2005 Kevin has trained over 500 students from all corners of the globe in the safe and effective examination of mobile devices.

Another course I have attended tutored by Kevin Mansell that cannot be faulted. Superb, unrivalled presentation. Educational, informative, fun & invaluable
